NeuralPLSI and SplinePLSI simulation inference, n = 2000, 500 replicates per setting

A Coverage of the 95% bootstrap CI for each coordinate of β and γ

B SE calibration for each coordinate: below 1.0 means the intervals are too narrow

C Estimation accuracy: RMSE of each coordinate, and of g over $|u| \le 2$

D Pointwise coverage of the 95% bootstrap band for g(u)
